Subject: Public Comment on Microsoft

To US District Judge Colleen Kollar-Kotelly

I am just one of the people over 65 with enjoy my computer and like the way Microsoft makes it easy for me to use the computer. I am very upset that special-interest groups have more say than the individual people who use computers on a regular basis. Because of what the Special Interest Groups have done to Microsoft (AOL/Sun Micro/ and all the rest of the Jealous companies) the stock market went in the toilet and I have lost of money along with a great many other people in the United States. Everyone say Enron was bad this was worse, but this law suit has caused much more damage in individual investors. Stop this silly law suit and send all the attorney generals home, as well as all the trial Lawyers. Microsoft is a good competitor. So let the others companies compete. I love all my programs in one and don't want separate

Good Luck
